

QSE Commitment

2022

The operation and continuous improvement of BALSAN are based on the respect and promotion of our values. The company has long been committed to **Quality**, **Safety** and the **Environment** because these are major strategic issues. Through our integrated management system, the leadership is determined to make sustainable progress regarding:

- The satisfaction of our customers and key partners
- Safety and ethics in our businesses
- The environmental and regulatory responsibility of our products and factories
- The quality and know-how of our teams
- Creativity and customization

Everyone, at all levels, in the exercise of their functions, must be aware of their part and their responsibility in achieving our common objectives.

I am personally committed and ask all employees to contribute energetically to the continuous improvement of our QSE performance.

Christophe POUILLE
